# Quadrant

-BY ABC-REOLER 

*«Quadrant er et meget let og designmæssigt helt tidløst system. Systemet samles med nogle unikke patenterede aluminiumsbeslag, der giver reolen et flot aluminiumslook i alle samlinger. Beslagene giver reolen det lette udtryk, idet der aldrig vil opstå dobbeltsider, uanset hvordan systemet bygges. Beslagene bevirker også, at det er nemt, at udbygge og ombygge reolen. Man kan således vælge en af de tre dybder til sin reol, men de tre dybder kan også kombineres i én og samme reol. Gulvmodulerne er fremstillet, så de fremstår ligeså præsentable bagfra som forfra. De forskellige farve- og finer variationer, dybder og de forskellige modulelementer gør det meget nemt, at kombinere og sætte sit personlige præg på såvel udseendet som funktionaliteten. Det enkle og flotte design og minimalistiske udtryk på Quadrant gør reolen velegnet i næsten alle sammenhænge.»*

*«Quadrant is a very elegant and completely timeless design system. Quadrant is assembled with patented aluminum fittings which give the system a unique character. The fittings give the shelves their elegant look, as there will never be any double sides, no matter how the system is built. The fittings also entail that it is easy to extend and rebuild the shelving system. You can choose one of the three depths for your shelves, but you can also combine the depths in one shelving system. All floor modules are made so they are equally presentable from the back as from the front. Shelves and back panels are accessories and they provide a unique possibility of combining the modules in color and veneer, and in that way create a personal look and function. The simple, stylish design and the minimalist expression of Quadrant makes the shelving system suitable for all rooms of the house.»*
